

HYDRAULICS

# CEJN Multi-X

*– Flexible multi connections for quick and easy handling*

**CEJN Multi-X allows you to**

- Minimize downtime during tool changes
- Connect the hydraulic lines with residual pressure
- Install multi-plates in confined spaces
- Use working pressure up to 5076 PSI (350 bar)
- Eliminate cross connection

# Multiple connections in one step with CEJN's Multi-X range

*– Advanced technology made easy*

CEJN Multi-X is a range of innovative, easy to handle, multi-plates designed to meet and exceed the demands of even the most challenging mobile hydraulic application. Its innovative design rivals and surpasses other existing multi-plates on the market. The unique design made with the user in mind offers you a plate system that provides great flexibility, high performance, easy installation and trouble-free operation.

EASY TO  
MANEUVER

ENVIRONMENT FRIENDLY  
FLAT-FACE CONNECTIONS

CONNECTABLE  
UNDER PRESSURE

TORSION FREE  
CONNECTORS

FLEXIBLE  
INSTALLATION

SMALL SPACE  
REQUIREMENTS

# Arguments for Multi-X

Single ISO 16028 Flat-Face couplings can be used with fixed installed male plates.

The WEO hose connection is self-aligning and makes connection easy and prolongs hose life.

## Flexibility

**The range** consists of six standard configurations, matching the most frequent application needs. The sizes range for DN 10 to DN 19 combined with two or four ports in each plate (for details on the range see pages 6-7). Each plate can also be equipped with an optional electric connector (available as accessory).

**The innovative design** allows you to use either part of the plate system mounted as the fixed plate without compromising the performance. The mounting bracket is enclosed with the female plate but you can just as easily use it to install the male plate in the application instead.

As an extra advantage when you use the male plate as the fixed installation you can connect standard ISO 16028 flat-face couplings to the Multi-X plate, giving you maximum flexibility to use tools and attachments both with and without a Multi-X plate.

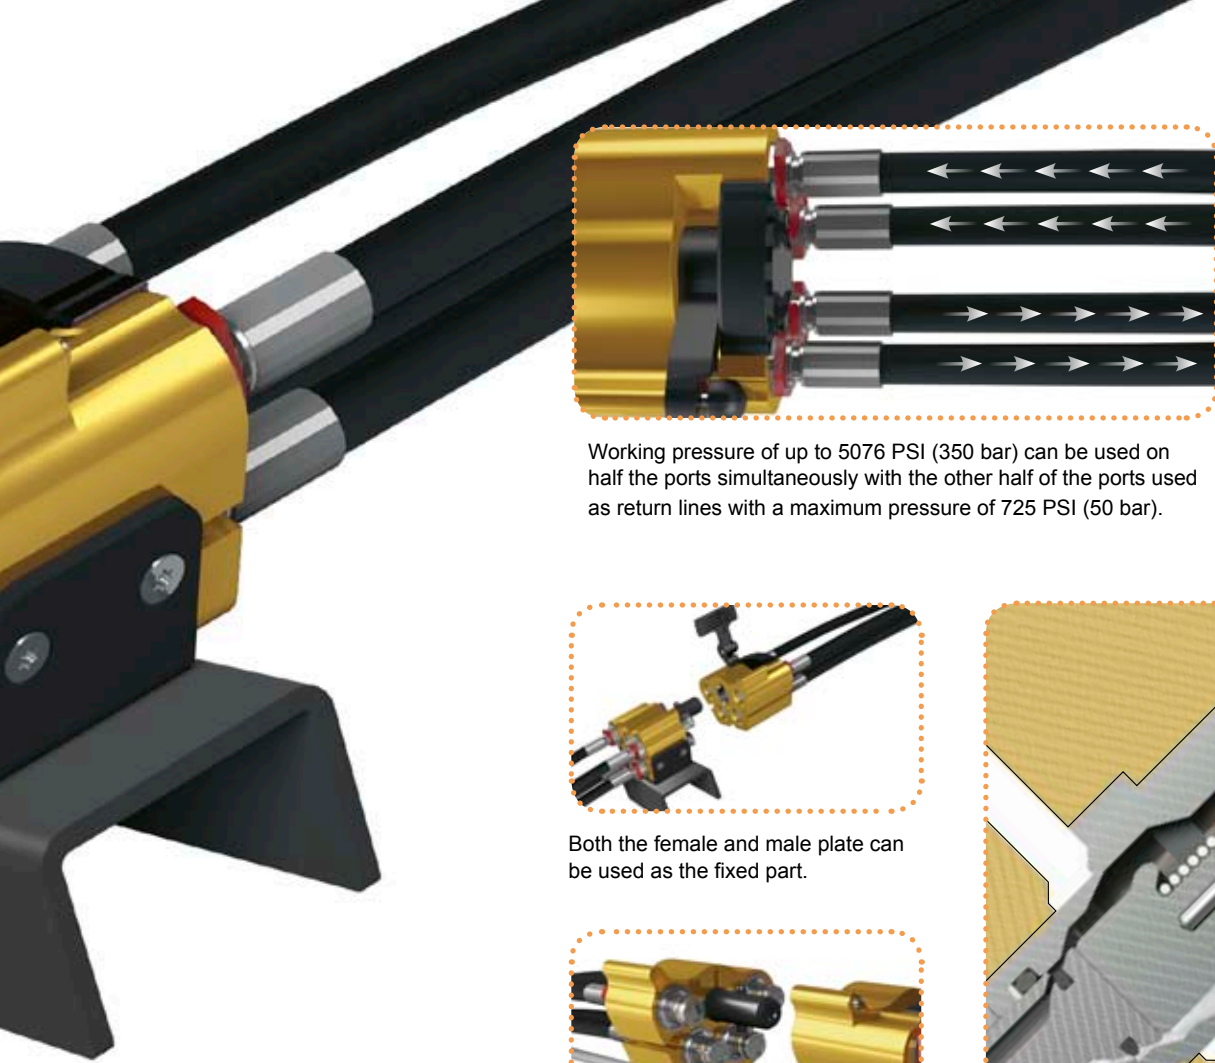

## Performance

**The Multi-X design** allows you to use a working pressure up to 5076 PSI (350 bar) on half the ports simultaneously and the rest of the ports as return lines with a maximum of 725 PSI (50 bar), regardless if you use two or four ports.

The design also offers the possibility to connect the units with residual pressure.

### Residual pressure

1. Up to 5076 PSI (350 bar) residual pressure on the male side and free to drain on the female side.
2. Up to 3625 PSI (250 bar) residual pressure on the female side and free to drain on the male side.
3. Up to 3625 PSI (250 bar) residual pressure on the male side and 145 PSI (10 bar) return resistance on the female side.

Working pressure of up to 5076 PSI (350 bar) can be used on half the ports simultaneously with the other half of the ports used as return lines with a maximum pressure of 725 PSI (50 bar).

Both the female and male plate can be used as the fixed part.

Electric connectors can easily be attached to each plate.

The pressure is punctured without spillage making it simple to connect with residual pressure in the system.

## Connections

The **Multi-X range** is outfitted with WEO Plug-In hose connections, making them both easy to assemble and to connect. Using Plug-In connections provides the Multi-X range with the same outstanding features as the CEJN WEO Range products – self-aligning hose connections that prolongs hose life, minimized downtimes when the need to replace or remove the hose occurs and its minimal space requirements that allows for more compact designs.

Each Multi-X plate comes with **integrated WEO cartridges** for easy installation. Use the WEO Hose connection nipples and ferrules to crimp the nipples directly onto the hose or convert your existing hose to WEO Plug-In with the threaded WEO Nipples (see part numbers page 10).

## Operation

The Multi-X is **easily operated** with one hand on the lever and one hand guiding the moving plate during both connection and disconnection. The ergonomical lever placed perpendicular to the hydraulic lines keeps the **operators hands safe**. The locking button secures the lever when connected and prevents unintentional disconnection.

All Multi-X male plates are equipped with **pressure eliminator nipples** that make it possible to connect the plates also with residual pressure in the system. By puncturing the pressure, without spillage, it allows for a smooth connection even at a high residual pressure (up to 5076 PSI (350 bar)).

The self-aligning WEO connection **removes the torsion** in the hose, a common issue when using ordinary fittings, making it easy to align and connect the plates.

# Multi-X range

## Technical data

- Max. working pressure** ..... 5076 PSI (35 MPa)
- Min. burst pressure** ..... 17 400 PSI (1200 bar)
- Temperature range** ..... -22°F to +212°F (-30°C to +100°C)
- Material female plate** ..... Zinc plated steel, anodized aluminum, zinc, brass
- Material male plate** ..... Zinc plated steel, anodized aluminum, brass
- Material seal** ..... Nitril (NBR)
- Disconnection under pressure** .... To be avoided. Residual pressure can result in recoil effect during disconnection. Always grip the lever firmly.
- Comment** ..... Contact CEJN technical support for recommendations for high impulse applications.
- Disconnection under pressure** .... To be avoided. Residual pressure can result in recoil effect during disconnection. Always grip the lever firmly.
- Comment** ..... Contact CEJN technical support for recommendations for high impulse applications.

CONNECTABILITY CASE NO.		DN10 - 3/8"	DN12.5 - 1/2"	DN19 - 3/4"
1.	Connectable with residual pressure on the male side and free to drain on the female side	5076 PSI	5076 PSI	5076 PSI
2.	Connectable with residual pressure on the female side and free to drain on the male side	3620 PSI	2175 PSI	870 PSI
3.	Connectable with residual pressure on the male side and 1 MPa return pressure on the female side	3620 PSI	3190 PSI	3190 PSI

Measurements refer to outside dimensions of the Multi-X plate with the electrical connector kit installed. All measurements are in mm.

## Multi-X Aluminum Cover/Parking Dock

The aluminum covers can be used as heavy duty protection when the plates are disconnected. The covers can also easily be mounted and used as fixed parking docks. Covers are only available for plates without electric connectors (can be used with the electric connector but will not cover the electric pins).

**Material**..... Aluminum
