

CEJNs Climate Footprint

CEJN have started measuring its corporate CO₂ emissions according to the Green House Gas protocol (GHG). During 2024 we will measure and set targets for scope 1 and 2. Under 2025 we will start the work measuring scope 3. See picture 1 below describing what is included in each scope. Our GHG measurements is part of a larger sustainability project where we strengthen and widen our sustainability management.

We are covered by the EU Corporate Sustainability Reporting Directive (CSRD) from 2025. CSRD will oblige us to report specific parts of the ESRS standards, the EU Taxonomy, and

Skövde 2024-05-07

our Corporate CO2 emissions. We recognize this to be a challenge but also a possibility and opportunity to learn more and become more sustainable in all aspects of our business.
